Profile

- Detail-oriented software engineer with expertise in full stack development. Demonstrated ability to adapt to new technologies and deliver efficient solutions. Strong focus on backend development and user interface design.

University Experience

February 2023 – June 2023

Full Stack Developer [End of Study Internship] *at* ***Foreign Job***

Location: Monastir

Role: Developed a web and mobile e-commerce application for product sales without stock management, incorporating secure PayPal payments.

- Built a seamless user experience for both web and mobile platforms.
- Integrated secure PayPal payment processing for safe transactions.

Tech env

React JS | Node JS | React Native | GitHub| Postman | PayPal Developer | React Query |Express JS |Tailwind CSS |Flowbite CSS

June 2022 – August 2022

Full Stack Developer (Internship) *at* ***Amilcar Petroleum Operation***

Location: Sfax

Role: Developed a management platform for employee activities with three distinct roles: administrator, employee, and HR.

- Enabled employees to submit activity requests, which HR can approve or reject, ensuring transparent and effective management.

Tech env

React JS | Node JS| Sequelize | Postman | Bootstrap

February 2022– June 2022

Full Stack Developer (Internship) *at* ***Ecole International Multidisciplinary School***

Location: Sousse, Tunisia

Role: Designed and developed the educational web application "ForceLearn," featuring two user roles: teacher (for adding paid and free courses) and student (for accessing courses).

- Facilitated course management and access for both teachers and students.

Tech env

React JS | Node JS | MongoDB | Postman |Material UI | Express JS

February 2020 – June 2020

Creation and Administration of a Local Network (End of Study - License) *at Shell Tunisia Upstream*

Location: Sfax, Tunisia

Role: Created and administered a local network for the company, incorporating a monitoring application to ensure efficient network management.

- Implemented solutions for effective network oversight and maintenance.

Tech env

Packet Tracer | PuTTY | Windows Server

Personal Projects

March 2024 - Present

Project 3: Accounting Automation Platform

- Developed an application for HBM Consulting to automate accounting processes, improving efficiency and accuracy.
- Integrated **Socket IO** for real-time chat functionality and leveraged **AWS S3** for secure file storage and management.

December 2023– February 2024

Project 2: Pastry Shop Ordering System

- Built a web application for a pastry shop to simplify the ordering process for sweet and savory products.
- Focused on user-friendly interfaces and smooth workflows to enhance customer experience.

September 2023 – November 2023

Project 1: Hairdressing Salon Booking and Reservation System

- Designed and implemented a responsive web application enabling customers to book appointments and make reservations seamlessly.
- Enhanced user experience with intuitive interfaces for browsing services and managing reservations.

Tech env

React JS | Node JS | MongoDB | Express JS | Postman | Material-UI | Git | AWS |CSS | Socket IO

Education

2020 – 2023

Computer Engineer

Location: Sousse, Tunisia

Ecole pluridisciplinaire internationale Sousse (EPI digital school)

2016 – 2020

Applied license in network security administration

Location:
Mahdia

Higher Institute of Computer Science in Mahdia.

2016

Baccalaureate (computer science)

Location:
Chebba

Lyceum Ibn Rochd Chebba
