SUMMARY

Full-stack software engineer specializing in high-performance backend development and the creation of modern administration interfaces. Expert in the Node.js ecosystem (Express, TypeScript, Sequelize, PostgreSQL) and Angular for designing interactive and secure administrative dashboards. Experienced in integrating third-party services: Stripe (payments), OneSignal (push notifications), and Minio (S3-compatible object storage). Rigorous and collaborative, I am committed to delivering maintainable, well-documented, and high-performing solutions.

WORK EXPERIENCE

Full-Stack Developer | La Plateforme Digital de Gestion (Contract) | Remote Juin 2025 - Present

- Development and maintenance of robust backend services and scalable RESTful APIs using Node.js, Express, and TypeScript.
- Design and management of the database architecture with PostgreSQL and Sequelize (via Pg4Admin), ensuring data integrity, performance, and scalability.
- Complete development of an administrator dashboard using Angular, connected to REST APIs, enabling user management, transaction tracking, and real-time metric visualization.
- Integration of Stripe for online payment management (checkout, webhooks, subscription management).
- Implementation of OneSignal for sending multi-channel push notifications.
- Use of Minio as a self-hosted object storage solution (AWS S3 compatible) for the secure management of documents, avatars, and administrative files.

Technologies: Node.js | Express.js | TypeScript | PostgreSQL | Sequelize | Pg4Admin | RESTful APIs | Angular | Stripe | OneSignal | Minio | Bitbucket | Jira

Web Editor & WordPress Specialist (Freelance) | Datamall Group (Nabeul) | Remote Feb 2025 – Mar 2025

- **Mission:** Managed a one-month contract for online content management and web optimization.
- Executed content updates and managed social media presence across various platforms.
- Modified and optimized website content and functionality based on tasks assigned via ClickUp.
- Maintained consistent real-time communication for task tracking and project follow-up.

Technologies : ClickUp | WordPress | Social Media Platforms | PhpMyAdmin

Full-Stack Developer (Freelance) | Remote

Sep 2023 – Dec 2024

- Delivered end-to-end web solutions for diverse clients, from requirement gathering to deployment.
- Accounting Automation Platform (HBM Consulting): Engineered a full-stack application to automate accounting workflows. Integrated Socket.IO for real-time user chat and Amazon S3 for secure, scalable file storage.
- Pastry Shop E-Commerce System: Built a responsive web app to streamline online ordering of sweet and savory products.
- Salon Booking System: Developed a customer-facing reservation and product ordering system, enhancing user engagement and operational efficiency.

Technologies : React JS | Node JS | MongoDB | Express JS | Postman | Material-UI | Git | AWS | CSS | Socket IO

MERN Stack Developer (Internship) | Foreign Job | Monastir (Hybrid)

Feb 2023 – Jun 2023

- Developed a stockless e-commerce application for web and mobile platforms from the ground up.
- Implemented a seamless cross-platform user experience.
- Integrated secure PayPal payment processing, ensuring PCI-compliant and safe financial transactions.

Technologies : React JS | React Native | Node JS | Express JS | MongoDB | React Query | PayPal Developer API | Postman | RESTful APIs | Tailwind CSS

Full-Stack Developer (Internship) | Amilcar Petroleum Operation | Sfax

Jul 2022 – Aug 2022

- Built an internal employee activity management platform featuring role-based access control (Admin, Employee, HR).
- Streamlined the request approval workflow, enabling employees to submit digital requests for HR review, which improved process transparency and reduced manual paperwork.

Technologies : React JS | Node JS | Express JS | Sequelize | REST APIs | Postman | Bootstrap

MERN Stack Developer (Internship) | EPI Multidisciplinary School | Sousse

Feb 2022 – May 2022

- Designed and developed "ForceLearn," an educational platform with dual user roles (Teacher/Student).
- Enabled teachers to create and manage paid and free courses while providing students with a centralized portal for course access.

Technologies : React JS | Node JS | Express JS | MongoDB | Material-UI | Postman | RESTful APIs

Network Administrator (Internship) | BG Group | Sfax

Feb 2019 – Jun 2019

- Implemented and managed a LAN for a medium-sized enterprise.
- Deployed a network monitoring solution to track device status and traffic, configuring automated email alerts for system failures.

Technologies : Packet Tracer | PRTG Network Monitor | SNMP | PuTTY | Windows Server

EDUCATION

Computer Engineer

2020 – 2023

Ecole pluridisciplinaire internationale Sousse (EPI digital school)

Applied license in network security administration

2016 – 2020

Higher Institute of Computer Science in Mahdia.

Baccalaureate (computer science)

2016

Lycee Ibn Rochd Chebba

SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, Java, PHP, SQL
- **Backend Frameworks & Libraries:** Node JS, Express JS, Sequelize
- **Frontend Frameworks & Libraries:** React JS, React Native, React Query, Socket.IO
- **Databases:** PostgreSQL, MongoDB, MySQL, Oracle, SQL Server
- **Cloud & DevOps:** AWS (S3), Git, GitLab, Bitbucket, Postman, Stripe, PayPal Developer API
- **Project Management & Tools:** Jira
- **Styling & UI:** Material-UI, Tailwind CSS, Bootstrap, CSS3
